

STAFF ENGINEER - FRONTEND WEB APPLICATION

Location: Palo Alto (California) or Bangalore (India)

Reference Code: REF030

Founded in 2014, Simless is a digital SIM card technology startup company. We provide cellular connectivity solutions to mobile operators, device manufacturers and subscribers. Our mission is to simplify the way billions of people and objects around the world access cellular networks. We believe that the digitization of physical SIM cards represents the first major step towards achieving this mission.

As a Staff Engineer, you will have the opportunity to grow your skills by working on cutting-edge technologies that will change the world of telecommunications.

Responsibilities

- Develop, test, deploy, maintain and improve Frontend Web Application.
- Manage individual project priorities, deadlines and deliverables.

Qualifications

- BA/BS degree in Computer Science or relevant technical field
- 7 years of relevant work experience in software development.
- 5 years of frontend web application development experience.
- Expert knowledge of AngularJS, Angular 2+ and Bootstrap, HTML5 & CSS
- Expert knowledge of UI testing with Protractor and Jasmin/Karma
- Expert knowledge of using REST API with JSON
- Knowledge of Bower, Grunt and ng
- Knowledge of OAuth2, JSON Web Tokens welcome
- Knowledge of payment provider integration
- Knowledge of SIM technology, ETSI and GSMA specifications is a big plus
- Server know-how of Spring/Spring Boot, JPA with Hibernate and REST using JAX-RS with Apache-CXF welcome
